-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. The claimed invention in **claim13** is directed to non-statutory subject matter.

Since "A program" (line 1 of claim 13) is merely a set of instructions capable of being executed by a computer, a program itself is not a process. The Applicant should revise the claims language to include the recitation such as -- *A computer readable storing medium which stores a program* --.

Allowable Subject Matter

3. **Claims 1-12, 14 and 15** are allowed.

Claim 13 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 101, set forth in this Office action.

4. The following is a statement of reasons for the indication of allowable subject matter:

Claims 1-15 have been indicated for allowance because the prior art fails to teach the combination of a printing apparatus including *when an upper end*, among an upper right end and an upper left end of the medium to be printed, that is on a side

opposite from a side where the detection means is positioned is leading by at least a set amount at the detection position, causing the detection means to be positioned on the other side that is opposite from the one side in the movement direction, then causing the carrying means to carry the medium to be printed from the detection position in a direction opposite from the predetermined direction, then causing the medium to be printed to be carried in the predetermined direction up to the detection position where the detection means detects the medium to be printed, and then causing the medium to be printed to be carried by a predetermined amount in the predetermined direction from the detection position.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Applicant's attention is invited to the patents to Quintana (US Pat. # 5,564,848), Shirota et al. (US Pat. # 6,666,600), Isono et al. (US Pat. # 6,840,691) and Romine (Pub. No. US 2005/0175386 A1)

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Minh H. Chau whose telephone number is (571) 272-2156. The examiner can normally be reached on M - TH 9:30AM - 8:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Judy Nguyen can be reached on (571) 272-2258. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
